WINSLOW's Super-Light™ Offshore Plus™ Life Rafts are manufactured to the same exacting specifications as the number one rated WINSLOW® Ocean Rescue™. The oversized buoyancy tubes, single arch, three position, auto inflatable canopy support system with Sure-Seal™ closures on all openings, inflation system, "top rated" auto deploying hemispherical drogue, Cape Horn Ballast System™, and primary boarding arrangement remain identical in every WINSLOW® Offshore model from our Ocean Rescue™ to our Standard Offshore™. The Offshore Plus™ includes three fixed viewing ports. Practical Sailor stated that "the Offshore Plus™, in its standard configuration, represents the best of the single-arch canopy rafts," adding the optional inflatable insulated double floor, survival gear storage pockets and rear canopy support arch (tripod arch), make this life raft a "good value". They also stated in their conclusions, that adding the above options, "gives you nearly top-rated performance and features at a relative bargain price..."
